

EZ-NICHES® from *Alpinebay* is the solution to the costly and long process of building a recessed niche. The prefabricated design is ready to tile and can easily be installed in minutes.

Constructed from recycled ABS, this lightweight and durable material is virtually indestructible. A tiled shower niche creates an attractive shelf to place your shower necessities. In addition, the niche is often used as a design focal point for decorative tiles. Get creative and use multiple sizes.

ALL YOU NEED TO INSTALL YOUR EZ-NICHES®

ADHESIVES

- Polymer Modified Thin-set Mortar
- Silicone Adhesive Caulking

Note: Check our website for a list of recommended setting materials

RECOMMENDED TOOLS

- Pencil/Markers
- Wall Trowels
- Screws
- Utility Saw/Knife
- Leveling Tool

STEP 1

Trace the rough-in size around the entire niche. Allow an additional 1/8" to allow room for adjustments.

STEP 2

Cut out substrate from traced lines. Avoid cutting framing members, water lines, electrical wires, etc.

STEP 3

Place your niche into the cut out substrate to ensure fitting. Use a leveling tool to ensure correct alignment.

STEP 4

Apply a continuous bead of silicone adhesive caulking on the back of the mounting flange.

STEP 5

Secure your niche into the wall with fasteners.

STEP 6

Skim a coat of polymer modified thin-set mortar around the edge of the niche to "feather" out the flange to the substrate.

STEP 7

Apply thin-set to the niche and back butter tile with polymer modified thin-set mortar to ensure full contact. Allow a longer setting time for tile to adhere to the surface.

DIVIDER/SHELF & (LRN/MRN) ARCH INSTALLATION

Apply silicone adhesive caulking on the back of the divider/arch to adhere into place.

(LSN) ARCH INSTALL

Use a sharp cutting tool to score the excess edge of the arch and snap off the excess piece.
